

Ludvig Boysen

I am a web server programmer, perpetual improver, and command line enjoyer. I like to learn from those more skilled than I am, and teach those less skilled. I am open minded about different ways to solve the same problem, and adaptable to teams, technologies, and methodologies.

TECHNICAL SKILLS

Server

PHP
Node, Express

Client

JavaScript, AJAX
React
Redux
Responsive CSS

Database

SQL
Mongo

Tools

Mocha, Jest
Docker
Git, GitHub
Hosting platforms (MongoDB Atlas, ElephantSQL, Netlify, Heroku)
Node package manager
phpMyAdmin, XAMPP
ESLint
GraphQL
VSCode

Methodologies

CI, CD
Mob programming
BEM CSS, semantic HTML
TDD, functional programming
Agile development
REST

Fluent English

RELEVANT WORK EXPERIENCE

Programming teacher

2021 - 2022

I taught programming with C#, and web development with HTML, JavaScript, PHP, SQL, and CSS as a teacher at Thorengruppen.

Programming tutor

2019 - 2020

I coached an individual through the Harvard course CS50, which includes Flask, SQL, C, JavaScript, and more, as a private tutor. For the final group project we developed an anti keylogger for GNU.

EDUCATION & TRAINING

</salt> Full Stack JavaScript

2022

I completed the full stack JavaScript program at </salt>, which is an intensive period of training that around 30 out of 1500 applicants get accepted to, and which not all 30 always make it through. In the program, trainees work in teams using mob programming on the weekdays, and complete individual programming tests on the weekends.

GY courses

2018 - 2019

I completed the courses web development 1 and 2, web server programming 1 and 2, and programming 1 and 2 at Hermods.
